## PRICE LIST

FOR  
1927

---

**GOING OUT OF BUSINESS**  
Great Reductions in Prices  
Rich Bargains for Customers

See Following Page

---

*George L. Stillman*  
DAHLIA SPECIALIST  
Westerly, Rhode Island

## *An Explanation*

**I**LL health nearly a year, a critical operation in the hospital, and my age (70 years) compel me to retire from all business responsibility.

My entire original collection of **WORLD RENOWNED DAHLIAS** must be sold at some price.

Prices are given herein for single divisions, and dozens of one kind. Write for prices of larger lots or make offers for the entire stock of any variety.

### **CASH WITH ORDER**

I have taken nearly twice as many orders from my field this fall for spring delivery as ever before, and indications are that the dahlia business this year will surpass all records.

---

Address all orders and communications to Geo. L. Stillman, Dahlia Specialist, Westerly, Rhode Island. **IMPORTANT.**—It is essential that you use the initial "L." as there are several Geo. Stillmans in town, but no other "Stillman" growing Dahlias.

## SPECIAL OFFERS

**Parcel Post or Express paid by the purchaser. See table below.**

For the benefit of those who are not familiar with the names, colors, and characteristics of the Dahlia, and wish to have the selection made for them, I make the following collections at a special low price to even up stock. They consist of an assortment of classes and colors and the entire selection must be left to me.

- No. 1 COLLECTION, twelve named varieties, several classes, my own personal selection, no two alike, and each one labeled ..... **\$1.00**
- No. 2 COLLECTION contains twelve fine varieties, my own personal selection, no two alike, and each one labeled. This collection contains not less than \$3.50 worth of bulbs ..... **2.00**
- No. 3 COLLECTION contains twelve varieties, or more, of extra nice assorted bulbs very carefully selected, no two alike, all labeled. The Dahlias in this collection amount to not less than \$7.00 worth ..... **5.00**
- No. 4 COLLECTION contains twenty bulbs, without labels, that have become mixed in handling. They are all good varieties, but labels have become detached. The supply for this collection is limited. The quality of bulbs that get into this collection and the present cost of labor makes it positively necessary to make the price of this collection ..... Postpaid in U. S. A. **2.00**

## Be Sure to Read This

It has been thoroughly demonstrated that nearly all small shipments of bulbs can be sent by mail and reach their destination quicker than by express.

NOTICE! The postage or express on all special offers must in all cases, except No. 4, be paid by purchaser, and if by mail, postage must be sent with the order or pay C. O. D. charges to destination, which often amounts to more than the postage.

**To ascertain the amount of postage to send.**

No. 1, 2 and 3 Collections weigh four pounds or less.

Your postmaster can tell you the cost of any number of pounds from Westerly, R. I. to your post office. Or you can use the following table. If you send more money than is used in postage, the surplus will be returned.

## SEED FIELD CORN

During the last few years I have taken great pride in producing the best corn for family use that can be grown. I think I have now four varieties that contain all the desirable features that any person could wish for family use. One for corn meal and three for green corn. Prices for selected seed follow.

### Stillman's Special Rhode Island Double Cap Corn

Outer end entirely capped. Butt nearly capped. The best white northern corn grown. The ears are large, butt stems are exceedingly small. The ears are easily husked and broken off. It yields two and three ears to the stalk. The kernels are large and in straight rows. It makes the sweetest and best table meal. The kind that makes the best R. I. Johnny-Cakes. Always get the Stillman strain.

30c. pt.

\$3.00 8 qts.

50c. qt.

\$5. half bu.

\$1.50 four qts.

## Corn Meal

Made from Stillman's Special Rhode Island Double Cap Corn. It's the sweetest and best meal on the market. Ground in an old-fashioned stone "Grist Mill." Fresh every week. Price, 10 lbs. \$1.25, postpaid in 1st and 2d Zone.

### Stillman's Extra Early Giant Sweet Corn

matures the earliest and has the largest ears of any extra early sweet corn. Nothing like it for the earliest crop.

Selected Seed, 75c. per pint, 40c. per 1-2 pint.

### The New Sweet Orange Corn

Much larger than the Golden Bantam. The sweetest yellow early green corn grown. Grows a medium height and ears profusely.

Selected Seed, 75c. per pint, 40c. per 1-2 pint

---

Don't be too proud to do a man's work

GEORGE L. STILLMAN'S DAHLIA  
PRICE LIST

---

## MT. SHASTA SWEET CORN

The largest and sweetest green corn in the world. This mammoth new corn is in a class by itself. Nothing can beat it for sweetness and its mammoth size.

June 6, 1923. A gentleman in South Carolina wrote me thus: "Please ship me two pounds of seed of your Mt. Shasta corn. I noticed your claim that your Mt. Shasta was the largest and sweetest corn, and I tried a small quantity last year, really thinking you were covering too much territory in your claim. Have decided you knew whereof you spoke. After eating your corn we no longer care for the ordinary sweet corn."

**Selected Seed, 75c. per pint, 40c. per 1-2 pint**

### WORM KILLER

#### THE WILLIAMS WORM KILLER

I have taken the agency for this new device for killing the borer inside the Dahlia stalks. It is a handy little tool and works to perfection without the slightest injury to the plants.

**Price, 50c. Postpaid**

## DAHLIA SEED

**IMPORTANT**—It is very important that you understand that every plant you get from seed is an entirely new variety and may be even better than the flower it is taken from. So please do not call any dahlia obtained from seed by any name that is already given to any dahlia as it has no connection with any other.

I do not save seed from poor, insignificant flowers. The wonderful success my customers have with my seed is ample proof that it is far superior to any on the market.

### DIRECTIONS FOR PLANTING

In the latitude of New York City seed should be sown about March 15th to April 1st. Flats or boxes about 3 or 4 inches deep are best. Cover the seed about  $\frac{1}{2}$  inch deep and keep in a warm place until the plants are all above ground. Then they can be moved to a cooler place. They should be kept in the sun to avoid growing too slender. Transplant in the open when weather is free from frost, about 15 inches apart. Discard any undesirable ones as soon as they bloom, thus giving the others more space.

---

**Be sure your full address comes with every letter or order.**

**DAHLIA STAKES**

As many of my customers make inquiries of me as to where they may obtain strong Dahlia stakes, I have arranged to furnish a good, strong, Oak Stake, 1½ inches square, and 6 feet long, in the rough, just as they come from the mill, at 12c. each, F. O. B. Westerly. These stakes will last almost a life time if kept under cover when not in use.

# GEORGE L. STILLMAN'S DAHLIA PRICE LIST

## GENERAL INSTRUCTIONS

**First of All.**—Send me your order as soon as you receive my catalogue, as the demand for some varieties often exceeds the supply, and those who order early are less liable to disappointment than if they waited till the rush at the time of planting. ORDER bulbs sent **early** to avoid disappointment. Kindly order by **name** and not by number.

If you do not want to spare all of the money to send with the order, send the order along, together with one-quarter of the amount as a guarantee of good faith, and the balance can be remitted when you receive notice that your order is ready to ship.

Customers who are not personally known to me will be notified when to remit the amount of their bill.

Bulbs are shipped as soon after April 1st as convenient, unless otherwise specified.

When sending orders use the Order Blank furnished with this catalogue. Any number of additional Order Blanks may be had upon application. When filling out the Order Blanks, be sure to fill out the Second Choice columns as well as the First Choice.

It is well to mention the varieties that you are willing to have substituted in case some of those selected are all sold out. Or, if requested, I will select such varieties as will substitute to best advantage. Otherwise, money sent for such bulbs will be returned to the sender.

**Size of Bulbs.**—Some varieties of Dahlias always produce very small bulbs (or tubers), while other varieties make large ones. So do not consider small bulbs as worthless, for they are equally as good as large ones.

**I Guarantee Every Bulb I Sell.**—The

utmost care is always exercised in selecting every bulb I send out, and every one is believed to have at least one good sprouting eye that will produce a good plant under proper care, or replace it with another.

**Bulbs to be replaced after July 1st** will be booked for shipment the next season only, and in all cases the bulbs to be replaced must be returned.

**I guarantee all bulbs** to be true to name and sure to grow at the time they are sent out.

The best way to send money is by registered letter, money order or express order.

**Do not hesitate** to send small orders. An order for one bulb will be as carefully filled as an order for one thousand.

**Terms.**—Cash invariably in advance, or C. O. D. On all retail orders fully paid for in advance I will prepay carriage to any part of the United States. This does not apply to special collections.

**ATTENTION.**—Orders taken in the Fall not fully paid for will be sent C. O. D., unless previous arrangement has been made.

**Do not delay** ordering until the time to plant, as many varieties may be sold out before that time. ORDER EARLY.

If bulbs are received before it is convenient to plant them, they should be covered with moist earth until planted.

I use the utmost care to prevent errors in labeling and packing, but if an error does occur, kindly notify me, that it may be rectified immediately.

**Please bear in mind** that orders are booked and assembled in rotation as received, and are packed to be shipped at the time your order specifies.

## FERTILIZER FOR DAHLIAS

I am prepared to furnish both the Pulverized Sheep and Poultry Manure. They are both thoroughly pulverized and kiln dried, and all germs of weeds or grass destroyed. It is perfectly dry and convenient to handle. It is put up in 50 lb. and 100 lb. bags, and can be readily shipped by express or freight. Both of these fertilizers are especially adapted to dahlia growing and for all kinds of garden truck generally. For corn I especially recommend the poultry. Price of poultry in 100-lb. bags, \$4.00; 50-lb. bags, \$2.25. Sheep in 100-lb. bags, \$3.00; 50-lb. bags, \$1.75. F. O. B. Western.

## POINTERS ON GROWING DAHLIAS

There are always some people who do not succeed in growing Dahlias with their first season's experience, and are naturally very much disappointed. To those I wish to say that it is not due to a fault of mine or of the bulbs, but is wholly due to your method of cultivation, kind of soil, or weather conditions. A glance through the hundreds of letters I receive from pleased, enthusiastic people who purchase their stock from me is positive proof that my stock is without fault. Exercise a little patience and a whole lot of good common sense and you will grow as nice Dahlias as anyone.

**The Right Kind of Soil.**—The kind of soil for Dahlias is a light loam or a stony knoll or side hill.

It is very essential that the soil has good drainage. A rich soil is all right if it has good drainage. Heavy, solid ground will produce an abundance of foliage and few and inferior blossoms.

It should be borne in mind that the poorer the soil, the more fertilizer it requires, and the lighter the soil, the more water it needs. See directions for watering elsewhere. It is a very unwise thing to advise no fertilizer in growing Dahlias, especially in the Eastern states. As a rule nothing will grow without sufficient nourishment. Heavy soil is usually quite rich and when lightened as directed elsewhere, will not need as much fertilizing as weak, light soil.

**Heavy Soil.**—If your soil is heavy with a clay sub-soil, it should be lightened with coal ashes or sand. If coal ashes are used, the coarser that they are the better, the main object being to make the soil lighter, more porous, and to give it a good drainage. I have seen Dahlias grown to perfection on a spot where the soil was nearly clear coal ashes.

In applying coal ashes they should be plowed, or spaded in, broad cast, 10 to 18 inches deep, and not dumped in one spot where the Dahlia is planted. One part coal ashes, or sand, and one part soil will not lighten it any too much. This will give a better drainage and allow the sun to act on the soil to a greater depth.

Ashes from either hard or soft coal will do but on very heavy soil those

from soft coal are preferable, being much coarser. Both kinds mixed together are also desirable.

**Watering.**—Watering is one of the most essential things in producing perfect blooms on your Dahlias. 90 per cent. of the failures in growing Dahlias is due to lack of water when the hot days of Summer come. Did you ever notice that the stalk of the Dahlia is about all water except the outside shell, and that where sufficient water is supplied the hole in the center of the main stalk is nearly full of water?

The Dahlia, as soon as it begins to bloom, will absorb the moisture from the soil for a distance of two or three feet. For example: Dig down deeply amid the roots of the Dahlia and then again about 4 or 5 feet from the plant and observe the difference. The dry hot days come earlier some years than others, but usually when the buds begin to open it is time to begin watering.

The best method of doing this is to make a basin-shaped mound of earth around the plant, about 2 feet in diameter, and into this basin turn three or four water pails full of water as often as every three or four days. Fertilizer is used to obtain size, water to make richness of color and perfection. Try it.

**Planting.**—The ground should be plowed or spaded to a depth of 8 to 10 inches. Make the drill to receive the bulb, 12 to 16 inches long and 6 inches deep, and about 6 inches wide. Lay the bulb down flat in the drill and then apply the fertilizer on both sides of the bulb, 4 to 6 inches from the bulb. If pulverized Sheep Manure is used, about one pint to one quart is usually sufficient to each bulb according to the strength of the soil. If poultry manure is used one pint to each plant is sufficient.

It is very desirable to plow in a quantity of stable manure broadcast. Always stick the stake in the ground before covering the bulb and thus avoid piercing any part of the bulb.

---

**Do not hesitate about ordering Dahlia Bulbs on account of distance, for they go safely by mail or express to any part of the world.**

---

Did you ever notice when a mule's kicking he isn't pulling?

# GEORGE L. STILLMAN'S DAHLIA PRICE LIST

## A TALK FOR THE BEGINNER

Do not expect to grow as large flowers as an expert the first year that you try Dahlias, for with any flower you need some experience as well as instruction in order to have great success.

One of my customers said that he had no luck with Dahlias until he read my catalogue. There he found the very information that he needed, viz.: **How to lighten the soil and render it porous.**

If you have a heavy growth of plants and no flowers, it is an indication of too heavy soil, or the same result will be encountered on some dry, rich land. In the latter case water is what is needed and in great abundance, say three or four pails of water three times a week to each plant, with some liquid fertilizer once a week.

Notice that after a heavy rainfall Dahlias take on a new life and the flowers are fuller in the center and more brilliant in color.

All the Dahlias described in this catalogue as to color and shape are described to the best of my ability, but I do not guarantee them to fully meet the ideas of all purchasers in regard to color shadings.

The best method of planting in the field is to make the distance between every other row 3 and 5 feet, respectively, thus affording a passageway on one side of each row after the plant will become large and fill the 3-foot space. 2½ to 3 feet apart in the row according to the nature of the plant is about the right distance when 3- and 5-foot spaces are used. Do not plant near trees or shrubs, as tree roots will take the strength of the soil from the Dahlia. In the open by themselves is the best place. Avoid the south side of a large building where the sun is extremely hot without a good circulation of air, for the flowers will burn on the back before fully open.

For early flowering they may be planted any time after May 1st or as soon as all danger from frost is passed.

Some people have an idea that the larger the bulb the better the plant it will make, but this is not the case. A small bulb is just as good as, and in many cases better than, a large one.

**The Clumps** should be divided about the time that you are to plant in the Spring. At this time you can readily see where the sprouts are and with the use of a knife the head of the clump

can be split through between the sprouts, or eyes, taking whatever bulb, or bulbs, would come off with one sprout. One sprout is always better than more. If the sprouts are over 2 inches long when you plant the bulb it is better to cut them off a half-inch from the bulb and a new sprout will come and make a better one than the slender one that grew in the cellar.

**Care of the Plants.**—Keep the ground well cultivated and free from weeds. A frequent stirring of the surface is very beneficial. An application of some standard fertilizer raked into the surface of the soil around the plants two or three times during the season will be very helpful to the development of the flowers.

**Never** leave more than one or two stalks in a hill. You will have better plants and larger flowers if you will allow only one sprout to grow.

When the buds begin to open a dressing of liquid fertilizer around the plants, several times in a season, will also be beneficial.

**Stakes may be used** to advantage to prevent plants from breaking down.

**Disbudding.**—The proper way to disbud the plants is as follows: If the first, or crown bud, appears to be weak or defective, cut it off.

Then when flowers appear on branches, cut them for decorative purposes, below one or two joints, thus removing with the flower whatever buds and foliage may be there. The flowers and foliage cut thus give a better effect for whatever purpose they are to be used. This method is a good invigorator for the plant and at the same time does all the disbudding required on the majority of Dahlias.

**Remember,** if bulbs are received before you are ready to plant them, cover them with moist earth to keep them from drying up.

**Care of the Bulbs in Winter.**—After the frost has killed the foliage, lift the clumps with a spade fork and allow them to dry in the sun about half a day. They should then be stored in a place free from frost. If an old style cellar without cement bottom or heat, they need not be covered, but if cemented and heated by furnace, they should be covered with papers and cloth to keep the air from them and thus prevent too much shriveling.
